### **DETAILED ACTION**

Claims 1-19 are currently pending.

#### ***Restriction Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3,11,12,16, drawn to first method for sorting protein structures and correspondent computer system, classified in class 702, subclass
- II. Claims 4-6,13,14,18, drawn to second method for sorting protein structures and correspondent computer system, classified in class 702, subclass 20.
- III. Claims 7-10,15,16,19, drawn to third method for sorting protein structures and correspondent computer system, classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are directed to patentably distinct methods which have different modes of operation and different steps. The methods have different number of interfaces involved in the execution of a method. A reference teaching method of Group I will not teach method of Group II or III; a reference teaching methods of Groups I or II will not teach method of Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
